

NOAH ABAYOMI OGUNNIRAN

Senior Frontend Engineer | React, Next.js and TypeScript

Lagos, Nigeria | +234 703 207 8859 | noahabayomi14@gmail.com | github.com/Pinnacle96

PROFILE

Frontend engineer with web development experience since 2019 building responsive, user-facing applications. Works with React, Next.js, TypeScript and Tailwind CSS to turn designs into usable interfaces, connect REST APIs and improve page performance. Backend experience in PHP/Laravel and MySQL supports close collaboration across the full product stack.

FRONTEND AND WEB SKILLS

React.js • Next.js and SSR • TypeScript • JavaScript ES6+ • Tailwind CSS • HTML5/CSS3 • Responsive and mobile-first design • REST API integration • Context API • Figma • Google Lighthouse • SEO • WCAG accessibility • Git/GitHub • PHP/Laravel

PROFESSIONAL EXPERIENCE

Freelance Frontend Developer | Contract projects | 2022–Present

- Developed Pishonserv International's property listing frontend with Next.js and Tailwind CSS, covering responsive browsing and listing flows connected to platform data and services.
- Built a responsive CMS website for Jidanfoods with REST API integration, translating client requirements into content pages and functional web flows.
- Delivered additional client web applications and dashboards, working with PHP/Laravel backends, APIs and production deployment.

Frontend Engineer | Remnant Christian Network Theological Seminary | 2023–2025

- Translated UI/UX designs into responsive interfaces using React and Tailwind CSS; enhanced website functionality and the user experience across devices.
- Improved reported page speed by 30% using Google Lighthouse findings and SEO practices; collaborated with colleagues on site goals and updates.

Project Consultant | Pinnacle Media Hub | 2019–2022

- Delivered responsive web solutions and worked with designers and backend developers to turn interface designs into functional client websites.
- Improved website performance and maintained client applications using JavaScript, HTML, CSS, PHP/Laravel and MySQL.

SELECTED WEB PROJECTS

Pishonserv Real Estate Marketplace | Next.js, Tailwind CSS and API integration

- Developed responsive property listing and management experiences; connected the web interface to platform services and supported ongoing production updates.

RCN Theological Seminary Website | React and Tailwind CSS

- Translated UI/UX designs into responsive website interfaces and improved reported page speed by 30% using Lighthouse findings.

Jidanfoods CMS Website | Responsive UI and REST API integration

- Built a client content-management website with responsive pages and API-backed functionality.
